

STAR DUST EcoChoice™

Virgin Recycled Sorbents™

“WORKS BETTER—GREEN—COSTS LESS!”

STAR DUST EcoChoice™ VIRGIN RECYCLED SORBENTS™ are a remarkable, environmentally friendly leap forward in sorbent technology. Gone are the energy wasting production methods and contents of traditional meltblown polypropylene sorbents. Those meltblown items used to be your only choice for sorbent pads, pillows, socks, booms, drum top pads, and rolls, but now you can benefit from the STAR DUST EcoChoice™ breakthrough that introduces the sorbents of the future.

WORKS BETTER (IMPROVED PERFORMANCE)

- Highly absorbent. Absorbs 16.5% more than comparable meltblown sorbents (Based on ASTM test standard 726)
- More complete wicking of spilled liquids
- Tough, durable cover stock
- Higher tensile strength after absorption of liquids than comparable meltblown sorbents, easing disposal issues

GREEN (ENVIRONMENTALLY RESPONSIBLE)

- STAR DUST EcoChoice™ VIRGIN RECYCLED SORBENTS™ are high-performance, yet environmentally friendly
- Uniquely blended from renewable, virgin recycled polypropylene
- A mere fraction of the energy used in the high temperature production of traditional meltblown polypropylene sorbents is used to produce the EcoChoice line, with obvious benefits to the environment

COSTS LESS (BETTER VALUE)

- Compare and see that the price for STAR DUST EcoChoice™ VIRGIN RECYCLED SORBENTS™ is typically lower than meltblown sorbents
- Higher absorption capacity also makes the EcoChoice Line much less expensive to use than traditional meltblown sorbents
- Do more with less

STAR DUST EcoChoice™ VIRGIN RECYCLED SORBENTS™ ARE AVAILABLE IN A WIDE RANGE OF FORMATS AND STYLES TO MEET YOUR NEEDS

- Depending upon the types of challenges you face at your facility, choose from a broad assortment of:
 - PADS • BOOMS • SOCKS • PILLOWS • ROLLS • DRUM-TOP PADS
- These fast-wicking, highly absorbent items are available in UNIVERSAL, OIL-ONLY, and HAZMAT formats
 - ◆ Choose the **UNIVERSAL** format when you have a wide variety of liquids—including unknown ones—to absorb
 - ◆ Choose the **OIL-ONLY** format for spills of petroleum based substances on the surface of water—absorbing oily contaminants and leaving the water. Ideal for spills in marinas, catch basins, sewers, ponds, lakes, rivers, and in industrial settings
 - ◆ Choose the **HAZMAT** format for hazardous liquids, including acids, bases, corrosives, chemicals and unknown liquids
